Our Client is a leading entertainment and media company in India engaged, inter alia, in the production of popular content broadcast on its STAR channels. Our Client is also an exclusive right owner for several works broadcasted on its STAR channels. Our Client, along with its affiliates, is the owner of an extensive portfolio of more than 70 channels in over nine languages – including channels like Star Movies, Star Bharat, Star Gold, Jalsha Movies, Star Sports 1, Star Sports HD 1, Star Sports Select 1, Star Sports Select HD 1, Maa Movies, Star Plus, to name a few (all channels owned and/or distributed by Our Client are hereinafter collectively referred to as "**STAR Channels**").

Our Client owns and operates the online audio-visual streaming platform and website, 'www.hotstar.com', and the mobile application, 'Disney+ Hotstar', formerly known as 'Hotstar' (hereinafter collectively referred to as "Disney+ Hotstar"). With the widest range of content in India, Disney+ Hotstar offers over 100,000 hours of TV shows and movies across 8 languages, Disney+ originals, latest American shows, blockbuster Hollywood movies and content from international studios, exclusive new content from the Hotstar Specials label, regional and national news, and coverage of every major global sporting event.

Responding to copyright infringement of exclusive rights in the work of our Client's work/content ("**Content**"), a Suit was instituted against various rogue websites (impleaded as Defendant Nos. 1 - 3 in the captioned matter) which engage in illegal and infringing activities (list of the domain names / websites is attached herewith), before the Hon'ble Delhi High Court, *inter alia*, for permanent injunction restraining violation of its exclusive statutory rights in the Content. Our Client also impleaded various Domain Name Registrars (Defendant No. 4-8), Internet Service providers (Defendant No. 9-17) as well as the concerned government departments (Department of Telecommunication and the Ministry of Electronics and Information Technology) (Defendant No. 18 and 19), as Defendants, to ensure effective compliance of any orders that the Hon'ble Delhi High Court was inclined to pass.

The above-mentioned matter came up before the Hon'ble Justice Mr. Amit Bansal, Delhi High Court on 26th September 2024. The Hon'ble Court was pleased to pass an *ex-parte ad-interim* order. The relevant para of the Order dated 26.09.2024 is extracted herein below:

*"38. In view of the averments noted hereinabove and in view of the judgment passed in **UTV Software Communication Ltd.** (supra), this Court is of the opinion that a prima facie case is made out in favour of the plaintiff. Balance of convenience is also in favour of the plaintiff. Further, irreparable harm or injury would be caused to the plaintiff if an interim injunction order is not passed.*

39. Accordingly, defendants No. 1 to 3 (and any such other UIs/websites which appears to be associated with any of the defendant apps and websites based on its name, branding or the identity of its operator, or discovered to provide additional means of accessing, the defendant apps and websites, and other domains/domain/apps/UIs along with their sub domains and subdirectories, owners/website operators/entities which are discovered to have been engaging in infringing the plaintiff's exclusive rights), their owners, partners, proprietors, officers, servants, employees, and all others in capacity of principals or agents, acting for and on their behalf, or anyone claiming through, by or under them are hereby restrained, from, in any manner hosting, streaming, reproducing, distributing, making available to the public and/or communicating to the public, or facilitating the same, on their Apps/UIs/websites, through the internet in any manner whatsoever, any cinematograph work/content/programme/show in relation to which plaintiff has a copyright.

40. The defendants No. 4 to 8 shall ensure compliance with this order by blocking defendants no. 1 to 3 websites, their URLs and the respective UIs as filed along with the suit (Pg 1 - Vol 1) (also annexed herewith as annexure - A) and any other UIs/apps/websites notified by the plaintiff by filing of an affidavit.

41. *The defendants no. 4 to 8, their directors, partners, proprietors, officers, affiliates, servants, employees, and all others in capacity of principal or agent acting for and, on their behalf, or anyone claiming through, by or under it, are directed to disclose the following information of the defendants no. 1 - 3 (and any such other websites/Uls which are discovered during the course of the proceedings and notified on Affidavit by the plaintiff to have been infringing/ authorizing the infringement of the plaintiff's exclusive rights, copyrights and broadcast reproduction rights):*

A. Complete details (such as name, address, email address, phone number, IP address etc.) of the defendants no. 1 - 3 (and any such other websites/Uls which are discovered during the course of the proceedings and notified on Affidavit by the plaintiff to have been infringing/ authorizing the infringement of the plaintiff's exclusive rights, copyrights).

B. Mode of payment along with payment details used for registration of domain name by the registrant i.e., defendant no. 1 – 3 (and any such other websites/Uls which are discovered during the course of the proceedings and notified on Affidavit by the plaintiff to have been infringing/ authorizing the infringement of the plaintiff's exclusive rights, copyrights).

42. *The defendants No. 9 to 17 shall ensure compliance with this order by blocking defendants no. 1 to 3 websites, their URLs and the respective Uls as filed along with the suit (Pg 1 - Vol 1) (also annexed herewith as annexure - A) and any other apps/websites notified by the plaintiff by filing of an affidavit.*

43. Defendants no. 18 and 19 are further directed to take immediate steps and issue requisite notifications within five working days, calling upon various internet and telecom service providers registered under them to block the aforementioned websites/Uls identified by the plaintiff."

In order to protect and enforce its Plaintiff's Content, Our Clients engaged the services of an investigation agency to monitor *inter alia* the aforementioned Rogue Apps to gather evidence of their infringing activity and to identify additional rogue Apps engaged in such infringing activities (in terms of Paragraph 38 and 39 of the aforesaid order dated 26th September 2024). An additional UI domain of the rogue mobile-based Android App, viz '**Playfy TV' App** has been identified by the investigation agency to be engaged in hosting and/or streaming and/or providing access and/or making available for viewing Our Clients' content, through the UI domain / website captured in the enclosed affidavit.

Consequently, in terms of the directions passed by the Hon'ble Court, *vide* order dated 26th September 2024), the *ex parte ad-interim* order dated 26th September 2024) (reproduced above i.e. paragraph 38 read with paragraph 39)) is also applicable with respect to this additional 1 domains / URLs.

I.A. 40565/2024 (O-XXXIX Rule 1 & 2 of CPC)

25. The present suit has been filed for permanent injunction, rendition of accounts and damages for the infringement of the exclusive rights in the plaintiff's original content/work, which is protected under the Copyright Act, 1957, against defendants no.1-3 which are rogue apps and websites that substantially indulge in online piracy by making original content available for download and otherwise providing access to infringing and illegal content.

26. It is averred in the plaint that the Plaintiff is a leading entertainment and media company in India engaged in, *inter alia*, the production of popular content broadcast on its STAR channels. The Plaintiff is also an

exclusive right owner for several works broadcasted on its STAR channels. Plaintiff, along with its affiliates, is the owner of an extensive portfolio of more than 70 channels in over nine languages (all channels owned and/or distributed by Plaintiff are hereinafter collectively referred to as “STAR Channels”). Plaintiff owns and operates the online audio-visual streaming platform and website, ‘www.hotstar.com’, and the mobile application, ‘Disney+ Hotstar’, formerly known as ‘Hotstar’ (hereinafter collectively referred to as “Disney+ Hotstar”). With the widest range of content in India, Disney+ Hotstar offers over 100,000 hours of TV shows and movies across 8 languages, Disney+ originals, latest American shows, blockbuster Hollywood movies and content from international studios, exclusive new content from the Hotstar Specials label, regional and national news, and coverage of every major global sporting event.

27. Plaintiff claims to have exclusive rights in the aforesaid works by virtue of provision of Section 14(d) of the Copyright Act, 1957 including inter alia the rights to publicly exhibit and communicate the said content through any medium or mode, including on STAR Channels or Disney+ Hotstar. It is pleaded that by virtue of the exclusive media rights granted to the Plaintiff, they broadcast, telecast and/or communicate to the public, its Original Shows / Original Content and the STAR Channels on the digital platform, Disney+ Hotstar, owned by the Plaintiff.

28. It is contended that defendants no. 1 to 3, (“defendant websites and apps”) are online locations and mobile applications whose purpose is to communicate, make available for viewing and providing access to content of the Plaintiff free of cost (or at minimal subscription) and without any authorization. These Rogue Apps are completely illegal mobile applications

and have no permission or authorisation to reproduce, store, transmit, communicate, make available for viewing or provide access to any of the Plaintiff's Content. It is also submitted that most of the content communicated through these Rogue Apps does not belong to them. It is also contended that the download, distribution and use of these Android based Rogue Apps, occurs through an .APK ("Android Package Kit" / "Android Application Package"). The primary intent and purpose of these Rogue Apps is to exploit various copyright-protected works, of the Plaintiff's content and to provide an alternative to legitimate sources to the user, such that the user does not have to pay for enjoying the copyright-protected works. An illustrative list of illegal content made available by the defendant websites has been provided in paragraph 9 of the plaint.

29. In order to protect and enforce their exclusive rights, the plaintiff investigated and monitored the defendant's Rogue Apps/UIs/Domains/websites and gathered evidence of their infringing activities, which has been filed along with the suit.

30. It is further contended that despite the legal notice calling upon the concerned defendants to cease from engaging in their infringing activities, they continue to infringe the rights in the plaintiff's original content.

31. In light of the above, it is contended that the defendants nos. 1 to 3 are liable for infringement of the plaintiff's copyright works under Section 51(a)(ii), Section 51(b) and Section 51(a)(i) of the Act, for making a copy of the original content, including storing of it in any medium by electronic or other means and communicating the original content to the public the hosting, streaming, reproducing, distributing, making available to the public, and/or communicating to the public of the original content for streaming and

downloading, or facilitating the same, without authorization of the plaintiff. In support of the aforesaid contention, reliance is placed on the decision of this court in CS(COMM) 724 of 2017 dated 10th April, 2019 titled **UTV Software Communication Ltd. &Anr. v. 1337x.to and Ors.**

32. It is further contended by the plaintiff's counsel that the creators of the defendants no. 1-3 Rogue Apps are anonymous and the information provided in the public domain regarding the owners of their related websites is either incomplete, incorrect and/or protected behind a veil of secrecy. These Rogue Apps/UIs/Domains/websites hide behind domain privacy services offered by various domain name Registrars, which enable a website owner to hide behind a veil and not disclose any contact details publicly, to protect his privacy. Defendants no. 4 (Name.com, Inc.), 5 (Spaceship, Inc.), 6 (Hostinger Operations, UAB), 7 (Name Cheap Inc.), 8 (Go Daddy LLC) are domain name registrars providing domain name registration to the defendants 1-3.

33. In order to overcome this, the plaintiff has arrayed various internet and telecom services providers (ISPs) as the defendants no. 9-17 (hereinafter "the said ISPs"), DoT as the defendant no. 18, MEITY as the defendant no. 19 in the present suit to ensure the effective implementation of orders passed by this Court.

34. Issue notice

35. Notice be issued to the defendants through all modes.

36. Reply(ies) be filed within four weeks.

37. Rejoinder(s) thereto, if any, be filed two weeks thereafter.

38. In view of the averments noted hereinabove and in view of the judgment passed in **UTV Software Communication Ltd. (supra)**, this Court

is of the opinion that a prima facie case is made out in favour of the plaintiff. Balance of convenience is also in favour of the plaintiff. Further, irreparable harm or injury would be caused to the plaintiff if an interim injunction order is not passed.

39. Accordingly, defendants No. 1 to 3 (and any such other UIs/websites which appears to be associated with any of the defendant apps and websites based on its name, branding or the identity of its operator, or discovered to provide additional means of accessing, the defendant apps and websites, and other domains/domain/apps/UIs along with their sub domains and subdirectories, owners/website operators/entities which are discovered to have been engaging in infringing the plaintiff's exclusive rights), their owners, partners, proprietors, officers, servants, employees, and all others in capacity of principals or agents, acting for and on their behalf, or anyone claiming through, by or under them are hereby restrained, from, in any manner hosting, streaming, reproducing, distributing, making available to the public and/or communicating to the public, or facilitating the same, on their Apps/UIs/websites, through the internet in any manner whatsoever, any cinematograph work/content/programme/show in relation to which plaintiff has a copyright.

40. The defendants No. 4 to 8 shall ensure compliance with this order by blocking defendants no. 1 to 3 websites, their URLs and the respective UIs as filed along with the suit (Pg 1 - Vol 1) (also annexed herewith as annexure - A) and any other UIs/apps/websites notified by the plaintiff by filing of an affidavit.

41. The defendants no. 4 to 8, their directors, partners, proprietors, officers, affiliates, servants, employees, and all others in capacity of

principal or agent acting for and, on their behalf, or anyone claiming through, by or under it, are directed to disclose the following information of the defendants no. 1 -3 (and any such other websites/UIs which are discovered during the course of the proceedings and notified on Affidavit by the plaintiff to have been infringing/ authorizing the infringement of the plaintiff's exclusive rights, copyrights and broadcast reproduction rights):

A. Complete details (such as name, address, email address, phone number, IP address etc.) of the defendants no. 1 - 3 (and any such other websites/UIs which are discovered during the course of the proceedings and notified on Affidavit by the plaintiff to have been infringing/ authorizing the infringement of the plaintiff's exclusive rights, copyrights).

B. Mode of payment along with payment details used for registration of domain name by the registrant i.e., defendant no. 1 – 3 (and any such other websites/UIs which are discovered during the course of the proceedings and notified on Affidavit by the plaintiff to have been infringing/ authorizing the infringement of the plaintiff's exclusive rights, copyrights).

42. The defendants No. 9 to 17 shall ensure compliance with this order by blocking defendants no. 1 to 3 websites, their URLs and the respective UIs as filed along with the suit (Pg 1 - Vol 1) (also annexed herewith as annexure - A) and any other apps/websites notified by the plaintiff by filing of an affidavit.

43. Defendants no. 18 and 19 are further directed to take immediate steps and issue requisite notifications within five working days, calling upon

various internet and telecom service providers registered under them to block the aforementioned websites/UIs identified by the plaintiff.

44. Further, the plaintiff shall, within one week of having filed such an affidavit, move an appropriate application for impleadment of the aforementioned websites/UIs notified by the plaintiff.

45. Compliance under Order XXXIX Rule 3 of the Code of Civil Procedure, 1908 (CPC) be done within one week from today.

46. List before the Joint Registrar on 4th December, 2024 for completion of service and pleadings.

UI Blocking Report of Cricfy TV

Modus operandi for Investigation:

Step 1: The Investigator download the app from the URL (<https://cricfy.net/windows-203/>)

The screenshot shows a web browser window displaying the Cricfy TV website. The page title is "Cricfy TV PC Version Download For Windows 10, 8, 7". The main content area features a red circular logo with a white TV and a cricket ball. Below the logo is a table with the following details:

App Name	Cricfy TV
Version	v6.2
Size	18 MB
OS	Windows 11, 10, 8, 7
Developer	Cricfy TV Team
Provided by	CricFy.NET

A "Recent download history" pop-up window is visible in the top right corner, showing the download of "CRICfy_v6.2 (1).apk" (17.1 MB) completed 1 minute ago. The Windows taskbar at the bottom shows the date and time as 16:52 on 07-08-2024.

Step 2: The Investigator then installed the Cricfy TV. apk file on "Mumu Player".

Note: The Mumu Player application enables Android applications to run on PCs running Microsoft Windows and Apple's macOS. This application's basic features are free to download and use.

Step 3: Before launching the Cricfy TV.apk application, The Investigator launched “Charles Proxy” to capture the data packets (network logs) of the Cricfy TV.apk app.

Note: Charles Proxy is a cross-platform HTTP debugging proxy server application written in Java. It enabled the user to view HTTP, HTTPS, HTTP/2, and TCP port traffic accessed from, to, or via the local computer.

- **Step 4:** The Investigator then launched the Cricfy TV app and simultaneously observed the network logs appearing in Charles Proxy. It was found the “cfyjfgnbjgv103.top” domain is being used to load UI.

Step 5: However, after blocking the above URL on the local system, the Cricfy TV app stopped working and it was unable to load the front UI. The Investigator tried to run the application multiple times after blocking this website, but the application was unable to run as it was trying to communicate with the blocked website. Step 2: We then installed the Cricfy TV. apk file on “Mumu Player”.

Note: The Mumu Player application enables Android applications to run on PCs running Microsoft Windows and Apple's macOS. This application's basic features are free to download and use.

Step 3: Before launching the Cricfy TV.apk application, we launched “Charles Proxy” to capture the data packets (network logs) of the Cricfy TV.apk app.

Note: Charles Proxy is a cross-platform HTTP debugging proxy server application written in Java. It enabled the user to view HTTP, HTTPS, HTTP/2, and TCP port traffic accessed from, to, or via the local computer.

- **Step 4:** We then launched the Cricfy TV app and simultaneously observed the network logs appearing in Charles Proxy. It was found the “lookmovie2.cloud” domain is being used to load UI.

Step 5: However, after blocking the above URL on the local system, the Cricfy TV app stopped working and it was unable to load the front UI. We tried to run the application multiple times after blocking this website, but the application was unable to run as it was trying to communicate with the blocked website. / URLs**

S. No.	Source Domain / Website / URL	Rogue App
1.	cfykjgvjjvn106.top	‘Cricfy TV’

Modus operandi for Investigation:

Step 1: The Investigator download the app from the URL (<https://cricfy.net/windows-232/>)

The screenshot shows a web browser window with the address bar displaying cricfy.net/windows-232/. The page content includes a table with the following details:

Size	18 MB
OS	Windows 11, 10, 8, 7
Developer	Cricfy TV Team
Provided by	CricFy.NET
Downloads	2536569
Last Updated	April 3, 2026

Below the table is a green button labeled "Cricfy TV v6.3 (18 MB)". Underneath the button are social sharing icons for Facebook, X, Pinterest, LinkedIn, YouTube, and WhatsApp. At the bottom of the page, there is a footer with copyright information and a list of links: Home, About Us, Contact Us, GDPR Policy, Privacy Policy, Disclaimer, Terms And Conditions, DMCA, and User Content Disclaimer.

A download notification is visible in the top right corner of the browser window, showing a file named "CRICfy_v6.3.apk" (18.2 MB) with a "Done" status.

Step 2: The Investigator then installed the Cricfy TV. apk file on “Mumu Player”.

Note: The Mumu Player application enables Android applications to run on PCs running Microsoft Windows and Apple's macOS. This application's basic features are free to download and use.

Step 3: Before launching the Cricfy TV.apk application, The Investigator launched “Charles Proxy” to capture the data packets (network logs) of the Cricfy TV.apk app.

Note: Charles Proxy is a cross-platform HTTP debugging proxy server application written in Java. It enabled the user to view HTTP, HTTPS, HTTP/2, and TCP port traffic accessed from, to, or via the local computer.

- **Step 4:** The Investigator then launched the Cricfy TV app and simultaneously observed the network logs appearing in Charles Proxy. It was found the “cfykjgvjjvn106.top” domain is being used to load UI.

- **Step 5:** However, after blocking the above URL on the local system, the Cricfy TV app stopped working and it was unable to load the front UI. The Investigator tried to run the application multiple times after blocking this website, but the application was unable to run as it was trying to communicate with the blocked website. Modus operandi for Investigation:

Step 1: The Investigator download the app from the URL (<https://cricfytv.io.in/cricfy1/>)

The screenshot shows a web browser window with the URL cricfytv.io.in/cricfy1/. The page features a red header with the Cricfy TV logo. Below the header, the text "Download Cricfy" is displayed, followed by a red "Download Now" button. A table provides details about the app:

App Name	Cricfy APK
Size	15.95 MB
Current Version	v5.8
Android required	5.0 or above

Below the table, a paragraph describes the app: "Getting the latest sports streaming app onto your smartphone is a quick and rewarding task. Most sports fans want a fast way to access global matches without any complicated sign-up forms. First, you must find a reliable source to get the official application file for your mobile device. While many platforms charge high fees, **Cricfy** offers a high-quality streaming experience for free on every compatible Android phone. Furthermore, the installation process takes very little storage space and runs smoothly on most hardware. You simply need to adjust your security settings to allow the manual setup of the software. Consequently, you can watch live cricket, football, and news channels within just a few minutes of starting. This efficient method ensures that you stay connected to every big tournament around the world. Use this simple guide to upgrade your mobile entertainment today."

A download history pop-up is visible on the right side of the browser window, showing a recent download of "CRICfy_v6.4.apk" (21.8 MB) which is marked as "Done".

Step 2: The Investigator then installed the Cricfy TV. apk file on “Mumu Player”.

Note: The Mumu Player application enables Android applications to run on PCs running Microsoft Windows and Apple's macOS. This application's basic features are free to download and use.

Step 3: Before launching the Cricfy TV.apk application, The Investigator launched “Charles Proxy” to capture the data packets (network logs) of the Cricfy TV.apk app.

Note: Charles Proxy is a cross-platform HTTP debugging proxy server application written in Java. It enabled the user to view HTTP, HTTPS, HTTP/2, and TCP port traffic accessed from, to, or via the local computer.

- **Step 4:** The Investigator then launched the Cricfy TV app and simultaneously observed the network logs appearing in Charles Proxy. It was found the “https://cfykkghljdvnjgn108.top” domain is being used to load UI.

Step 5: However, after blocking the above URL on the local system, the Cricfy TV app stopped working and it was unable to load the front UI. The Investigator tried to run the application multiple times after blocking this website, but the application was unable to run as it was trying to communicate with the blocked website. B. Mode of payment along with payment details used for registration of domain name by the registrant i.e., defendant no. 1 – 3 (and any such other websites/UIs which are discovered during the course of the proceedings and notified on Affidavit by the plaintiff to have been infringing/ authorizing the infringement of the plaintiff's exclusive rights, copyrights).

UI Blocking Report of Crexify TV

Please find below the updated investigation along with the evidence as required.

Modus operandi for Investigation:

Step 1: The Investigator download the app from the URL (<https://apk4y.com/crexify-tv/>)

Step 2: The Investigator then installed the Crexify TV. apk file on “Mumu Player”.

Note: The Mumu Player application enables Android applications to run on PCs running Microsoft Windows and Apple's macOS. This application's basic features are free to download and use.

Step 3: Before launching the Crexify TV.apk application, The Investigator launched “Charles Proxy” to capture the data packets (network logs) of the Crexify TV.apk app.

Note: Charles Proxy is a cross-platform HTTP debugging proxy server application written in Java. It enabled the user to view HTTP, HTTPS, HTTP/2, and TCP port traffic accessed from, to, or via the local computer.

- **Step 4:** The Investigator then launched the Crexify TV app and simultaneously observed the network logs appearing in Charles Proxy. It was found the “itsrandomtmctnoob.shop” domain is being used to load UI.

- **Step 5:** However, after blocking the above URL on the local system, the Crexify TV app stopped working and it was unable to load the front UI. The Investigator tried to run the application multiple times after blocking this website, but the application was unable to run as it was trying to communicate with the blocked website. - **Step 5:** However, after blocking the above URL on the local system, the Playfy TV app stopped working and it was unable to load the front UI. UI Blocking Report of Playfy TV

Modus operandi for Investigation:

- **Step 1:** The Investigator download the app from the URL (<https://playfytv.com/>)

- **Step 2:** The Investigator then installed the Playfy TV. apk file on “Mumu Player”.

Note: The Mumu Player application enables Android applications to run on PCs running Microsoft Windows and Apple's macOS. This application's basic features are free to download and use.

- **Step 3:** Before launching the Playfy TV.apk application, The Investigator launched “Reqable” to capture the data packets (network logs) of the Playfy TV.apk app.

Note: Reqable is a cross-platform HTTP debugging and API testing application. It enables users to view and analyze HTTP, HTTPS, HTTP/2, HTTP/3, WebSocket, and TCP traffic accessed from, to, or through the local computer and connected devices.

- **Step 4:** The Investigator then launched the Playfy TV app and simultaneously observed the network logs appearing in Reqable. It was found the “https://app.efootball26.online” domain is being used to load UI.

The screenshot displays the Reqable application interface. At the top, it indicates 'Proxying on 172.168.2.69:9000'. Below this, a table lists network traffic. Two entries are visible:

ID	Icon	Method	URL	Application	Code	Server IP
1109	{}	GET	https://app.efootball26.online/app.json	Unknown ...	200	104.21.12.252
1110	{}	GET	https://app.efootball26.online/cats/live-events.json	Unknown ...	200	104.21.12.252

The right-hand pane shows the details for the selected request (ID 1109). The 'Summary' tab is active, displaying the following information:

- URL:** https://app.efootball26.online/app.json
- Status:** Completed
- Method:** GET
- Protocol:** h2
- Code:** 200
- Remote Address:** 104.21.12.252:443
- Keep Alive:** true
- Stream:** #3

Overlaid on the bottom half of the Reqable window is an Android emulator running the 'PLAYfy TV' application. The app's interface includes a top navigation bar, a main content area with various sports icons (All, Football, Tennis, etc.), and a bottom navigation bar with options like Live Scores, Categories, Highlights, and Settings. A 'Join Telegram Channel' dialog box is also visible in the center of the app screen.

- **Step 5:** However, after blocking the above URL on the local system, the Playfy TV app stopped working and it was unable to load the front UI. The Investigator tried to run the application multiple times after blocking this website, but the application was unable to run as it was trying to communicate with the blocked website. UI Blocking Report of Cricfy TV

Modus operandi for Investigation:

- **Step 1:** The Investigator download the app from the URL (<https://cricfytvs.org.in/>)

- **Step 2:** The Investigator then installed the Cricfy TV. apk file on “Mumu Player”.

Note: The Mumu Player application enables Android applications to run on PCs running Microsoft Windows and Apple's macOS. This application's basic features are free to download and use.

- **Step 3:** Before launching the Cricfy TV.apk application, The Investigator launched “Charles Proxy” to capture the data packets (network logs) of the Cricfy TV.apk app.

Note: Charles Proxy is a cross-platform HTTP debugging proxy server application written in Java. It enabled the user to view HTTP, HTTPS, HTTP/2, and TCP port traffic accessed from, to, or via the local computer.

- **Step 4:** The Investigator then launched the Cricfy TV app and simultaneously observed the network logs appearing in Charles Proxy. It was found the “cfyhsvdsjgk114.top” domain is being used to load UI.

- **Step 5:** However, after blocking the above URL on the local system, the Cricfy TV app stopped working and it was unable to load the front UI. The Investigator tried to run the application multiple times after blocking this website, but the application was unable to run as it was trying to communicate with the blocked website. UI Blocking Report of Playfy TV

Modus operandi for Investigation:

Step 1: The Investigator download the app from the URL (<https://playfytv.com/>)

Step 2: The Investigator then installed the Playfy TV. apk file on “Mumu Player”.

Note: The Mumu Player application enables Android applications to run on PCs running Microsoft Windows and Apple's macOS. This application's basic features are free to download and use.

Step 3: Before launching the Playfy TV.apk application, The Investigator launched “Reqable” to capture the data packets (network logs) of the Playfy TV.apk app.

Note: Reqable is a cross-platform HTTP debugging and API testing application. It enables users to view and analyze HTTP, HTTPS, HTTP/2, HTTP/3, WebSocket, and TCP traffic accessed from, to, or through the local computer and connected devices.

- **Step 4:** The Investigator then launched the Playfy TV app and simultaneously observed the network logs appearing in Reqable. It was found the “https://ventiga.online/” domain is being used to load UI.

The image shows a Reqable network traffic analysis tool interface. The top bar indicates 'Proxying on 172.168.2.69:9000'. The main panel displays a list of network traffic items. The selected item is a GET request to 'https://ventiga.online/app.json' with a status code of 200 and a server IP of 104.21.34.34. The right-hand pane shows the details of this request, including the status (Completed), method (GET), protocol (h2), code (200), remote address (104.21.34.34:443), and keep-alive (true).

Overlaid on the bottom right is a screenshot of the Playfy TV app interface. The app shows a 'Thank you for downloading PLAYfy TV' message with a link to join a Telegram channel. Below this, there are icons for various sports categories: All, Cricket, Football, Tennis, Basketball, Baseball, and American Football. A 'Join Telegram Channel' pop-up is visible, encouraging users to join for updates. The app also displays a 'Motorsport | MotoGP' section with a 'Live' status and a 'Match Started' time of 6:06:34. At the bottom, there are buttons for 'Live Stream', 'Categories', 'Highlights', and 'Settings'.

- **Step 5:** However, after blocking the above URL on the local system, the Playfy TV app stopped working and it was unable to load the front UI. The Investigator tried to run the application multiple times after blocking this website, but the application was unable to run as it was trying to communicate with the blocked website. Subject: Action requested to be taken by MEITY and Plaintiff for effective removal of content for viewing by public at large within India as per the said orders of Hon'ble Court.

It is observed that a number of orders of Hon'ble Court are issued for blocking of websites every month. There are around more than 2700 ISPs in India and these ISPs are connected among themselves in a mesh network. DOT is instructing each of the ISPs through emails/through its website for blocking of the websites as ordered by the Hon'ble Courts. Ensuring compliance of the orders by each of the ISPs is a time-consuming and complex task especially in view of multiplicity of orders of Hon'ble Courts, multiplicity of websites to be blocked and multiplicity of ISPs.

2. Allocation of Business Rules inter-alia states thus:-

'Policy matters relating to information technology; Electronics; and Internet (all matters other than licensing of Internet Service Provider).'

3. In view of above and in order to ensure effective removal by content for viewing by public at large, the plaintiff is requested to do a trace route of the web server hosting the said website. In case the web server happens to be in India, the plaintiff may inform the same to Meity who may direct the owner of such web server to stop transmission of content as per IT Act and as directed by the Hon'ble Court so that the content would be blocked from the source itself and the exercise of blocking by 2700 ISPs would not be required.

4. In case such server is located abroad i.e. outside India then access to such URL/website can be blocked through the international internet gateways which are much less in number. This would result in timely and effectively removal of undesirable content for viewing by public at large as is the requirement as per the orders of Hon'ble Court.
